## Atlas Antiquus

L'Atlas Antiquus di Justus Perthes fu edito in Italia in questa edizione tascabile e si può facilmente dedurre, dalla ricchezza di particolari, che le cartine originali erano assai più ampie.

Per fortuna nostra con un computer si possono ingrandire le immagini tanto da poterne leggere anche le linee più piccole.

Da quest'opera sono poi derivati tutti gli atlanti storici attuali che tuttavia poco differiscono da quest'opera se non nei particolari non essenziali.

Riteniamo che sia cosa utile agli studiosi rendere ancora disponibile l'Atlas Antiquus e, vista la scarsissima disponibilità nelle biblioteche, lo ripubblichiamo integralmente indice compreso sperando che lo scanner abbia fatto un lavoro decente.

Il libro originale era piuttosto "vissuto" da quattro generazioni di Milizia ma ancora ben leggibile.

Sappiamo già che qualcuno dirà che alcune cose sono sorpassate, ma noi ancora non ne abbiamo trovate di significative.

A tutti buon lavoro,

## Prefazione.

I giudizi estremamente favorevoli dati sull' Atlante Scolastico di Giusto Perthes, e la grande diffusione che esso ebbe, non solamente in molte Scuole, a vantaggio grandissimo tanto degli insegnanti quanto degli alunni, ma ancora presso le persone colte, fecero sorgere l'idea di provvedere in modo analogo anche allo insegnamento della Storia, e primieramente della Storia antica.

Ecco adunque una serie di carte di Geografia antica, quale non si ebbe mai sino ad ora ad un prezzo tanto mite, tenuto calcolo della esecuzione chiara ed elegante delle singole tavole incise in rame, e della ricchezza del contenuto, la quale, senza nuocere in alcun modo all' indole modesta del lavoro, chiaramente appare dall' indice di non meno di 7000 nomi.

Sfortunatamente non fu concesso all' autore del piccolo lavoro, il professore Dr. A. van Kampen, di vederlo compiuto: alla sua morte, avvenuta lo scorso anno, tutte le carte erano già molto inoltrate nella incisione; ma ad esse abbisognavano ancora una esatta correzione, e specialmente l'indice dei nomi. Questo doppio lavoro venne dallo stabilimento Perthes affidato al sottoscritto, allievo riconoscente e collega devoto del defunto autore.

Il lavoro di correzione venne solamente limitato a rettificare i nomi erronei, e là ove lo permetteva lo spazio, all' aggiunta di alcuni nomi importanti sotto l'aspetto storico. Lo scrivente non è adunque responsabile della collocazione delle singole carte, delle scale adottate nella loro composizione, e della scelta della materia. A trovare facilmente i luoghi vale l'indice, nel quale ciascun nome segnato sulle carte è dato dal numero di queste e dalla indicazione del quadrangolo in cui esso nome è contenuto. Se si tratta di nomi di una medesima località ripetuti in parecchie carte, se ne è solo riportato quello che è contenuto nella carta di maggiore scala. Oltre alle abbreviazioni date più sotto, ogni nome è accompagnato da quello della regione in cui trovasi il luogo, il fiume od altra particolarità geografica: per questa maniera trovasi molto facilmente il luogo che si cerca, specialmente quando si tratta di non pochi nomi eguali riferentisi a
